

PATENT

Serial No. 09/653,782

Amendment in Reply to Office Action of July 19, 2005

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 5, between lines 24-28 of the specification with the following:

The microprocessor 12 operates in accordance with program software stored on a ROM 52. A power supply 54 for the telemetry module TM is connected to the microprocessor 12. A power control line 56 couples an output of the microprocessor 12 to a power control input 58 of the receiver 34.
